

Monologue "Education". 5130201/30002, Путята Михаил.

Education is the key to unlocking the potential of individuals and societies. As Nelson Mandela once said that education is the most powerful weapon which you can use to change the world. This quote resonates deeply with me as I believe that education is a fundamental right that should be accessible to all.

In Russia, the educational system is based on a 11-year school curriculum. Students start school at the age of 6 or 7 and leave school at the age of 17 or 18. They do exams and do homework in various subjects, such as Maths, Russian, and English. If they do one's best and pass the exams, they can go to college or enroll in higher education.

The educational system in Russia has some advantages and disadvantages. On the one hand, it is free and accessible to all. On the other hand, it can be outdated and bureaucratic. The quality of education can vary greatly depending on the region and the school.

I believe that education should be more flexible and personalized. It should be adapted to the needs and interests of students. It should also be more focused on practical skills and real-world problems and have a higher level of innovation and growth.

I have chosen Peter the Great St Petersburg Polytechnic University because it is one of the leading technical universities in Russia. It offers a wide range of engineering programs, such as Mechanical Engineering, Electrical Engineering, and Computer Science. Moreover, it also has a diverse student body and allows me to do academic researches.

Higher education is important for me because it will allow me to get a good job, where I expect a high starting salary, and bring enormous benefits to society. I want to study for a degree in Engineering because I am interested in technology and innovation. I believe that engineers are needed to create a new business, develop new products, and solve complex problems.

I think that higher education should be accessible to everyone, regardless of their background or financial situation. It should be free or charge low tuition fees. In other words, it should have financial assistance for students who need it.

I think that higher education should be accessible to everyone, regardless of their background or financial situation, due to the world must needs highly qualified people. It should be free or charge low tuition fees to promote greater equality. It should also have financial assistance for students who need it.

I also think that higher education should be more diverse and inclusive. It should offer programs in different fields, such as science, art, and humanities. It should also have a diverse faculty and student body.

Finally, I think that Higher education should be continuously improved and updated to ensure that students are receiving the most relevant and practical knowledge possible. It should prepare students for the future, not just the past. It should teach them how to think critically, solve problems, and be creative.

To sum up, education is a powerful tool that can change lives. It can help people achieve their dreams and make a difference in the world.
